

CELLULOSE CHEMISTRY AND TECHNOLOGY

ADVANCES IN THE CHEMISTRY, PHYSICS AND TECHNOLOGY OF
POLYSACCHARIDES AND LIGNIN

57♦2023

1 - 2 ♦ JANUARY -
FEBRUARY

C O N T E N T S

- MICHAELA DINA STANESCU, Applications of enzymes in processing cellulosic textiles – a review of the latest developments1-15
- ABDULHADI YAKUBU and ASHISH VYAS, Industrial application of alkaline cellulase enzymes in pulp and paper recycling: a review17-28
- JENNIFER BANDAÑO-ANTONIO and JOSE MARIO A. DIAZ, Chemo-mechanical extraction and characterization of sayote (*Sechium edule*) fibers at varying fiber maturity.....29-36
- SICILY RILU JOSEPH, HELEN T. P. SANDRA, ARYA NAIR, SARITHA A. CHANDRAN and MYTHILI USHAMANI, Cellulose nanocrystals from sugarcane bagasse: isolation, characterization and application37-47
- PABLO LIGERO, ALBERTO DE VEGA and XOAN GARCÍA, Development of combined organosolv–TEMPO oxidation treatment for obtaining cellulose nanofibres49-60
- KHUSHBOO KAPOOR, AJAY KUMAR TYAGI, MUKUL DAS and VIRENDRA KUMAR, Comparative analysis of morphological and structural changes in gamma and electron beam irradiated sugarcane bagasse61-70
- MOUROUG THAHER ZYADEH, IMAD MOHD KHAIR HAMADNEH, MAHMOUD ABDEL-RAHMAN KASRAWI, HAYTHEM SAADEH and MOHAMMED HASAN SHAHEIN, Synthesis of cellulose-based hydrogel for regulating the release of nitrogen fertilizer71-78
- İREM YAĞMUR MOL, FUNDA CENGİZ ÇALLIOĞLU, HÜLYA KESİCİ GÜLER, EMEL SESLİ ÇETİN and GÖKSEL BİLİR, Electrospinning of antibacterial cellulose acetate nanofibers79-91
- HENDRYK WÜRFEL, WENQIAN DANG and THOMAS HEINZE, Efficient heterogeneous synthesis of polygalacturonic hydroxamic acid: a versatile chelator for metal ion binding.....93-96

| | |
|--|---------|
| HANIEH SHOKRKAR, Model-based evaluation of enzymatic hydrolysis of microalgal cellulose and different cellulosic material | 97-106 |
| CRISTIAN DANIEL BOHORQUEZ-MORENO, KERIM EMRE ÖKSÜZ and EMINE DİNÇER, Porous polymer scaffolds derived from bioresources for biomedical applications..... | 107-116 |
| OLA TARAWNEH, ALAA HAMMAD, HADEEL ABU MAHFOUZ, LAMA HAMADNEH, RANIA HAMED, IMAD HAMADNEH and AMEEN RASHEED AL-ASSI, Development of mucoadhesive cellulose derivatives based films for the treatment of vaginal candidiasis | 117-124 |
| EDUARDO LEONARSKI, GIULIA VALAR MARTINI, KARINA CESCO, MARCOS FELLIPE DA SILVA, ROSANA GOLDBECK and PATRÍCIA POLETTI, Enzymatic upcycling of bacterial cellulose from kombucha to obtain cellobiose | 125-132 |
| JURAJ GIGAC, MÁRIA FIŠEROVÁ and ALBERT RUSS, Effect of precoating on properties of functional coating and electrical conductivity of inkjet-printed electronics..... | 133-142 |
| SALAH A. A. MOHAMED, MOHAMMAD L. HASSAN, ESSAM S. ABD EL-SAYED and MOHAMED EL-SAKHAWY, Cellulose nanofiber/shellac nanocomposite films as coatings for packaging paper | 143-153 |
| MURODKHON RASHIDKHONOVICH KODIRKHONOV, NOIRA RAKHIMOVNA VOKHIDOVA, SAYYORA SHARAFOVNA RASHIDOVA, XUAN NIE and JAMSHIDKHON KADIRKHANOV, Hybrid nanocomposites of methylcellulose: physico-chemical and antimicrobial properties | 155-165 |
| DRAGANA GRUJIĆ, ALEKSANDAR SAVIĆ, SAŠA PAPUGA, MILENA MILOŠEVIĆ, MITJA KOLAR, PREDRAG M. MILANOVIC and JOVANA Z. MILANOVIC, Optimization of enzymatic desizing and scouring of cotton fabric by response surface methodology | 167-184 |
| DHARMANSHU, ANKIT SINGH, MADHAV SAINI and JAVED SHEIKH, Utilisation of conical prickles of <i>Bombax ceiba</i> bark for multifunctional mosquito repellent colouration of cotton | 185-191 |
| GAMZE OKYAY, OĞUZ DEMIRYUREK, MÜNEVVER ERTEK AVCI and HILAL BILGIC, Development and characterization of hemp-containing hybrid yarns for clothing..... | 193-206 |
| LÍDIA KUNZ LAZZARI, EDUARDO FISCHER KERCHE, RODRIGO DENIZARTE DE OLIVEIRA POLKOWSKI, RICARDO ALBUQUERQUE and DANIELE PERONDI, Characteristics of biochar produced from cellulose for capture of atmospheric CO ₂ ... | 207-211 |
